

# KPI FOR EDUCATION

ORACLE CERTIFIED PARTNER

## THE KPI ADVANTAGE

KPI Partners is 100% focused on Oracle Business Intelligence.

KPI Partners leverages years of experience with analytics deployment methodologies and frameworks to deliver measurable results that enhance business performance and help resolve critical information challenges.

Armed with expertise in Business Analytics from a wide variety of industries, KPI Partners provides technical solutions that are reliable, flexible, scalable, and affordable.

The company founders have deep roots in packaged BI Application Architecture at Oracle and were instrumental in driving the architecture of the packaged BI Applications that Oracle sells today!

## K-12 Student Information System Analytics!

### KPI Partners has developed an Analytic Application that is specifically designed for school districts for K-12.

The K-12 Analytic Application enables schools districts to analyze real data collected on their students and staff, across a number of different criteria, with an aim toward improving student performance, teacher performance, school performance and overall district performance!

The Analytic Application also facilitates reporting to regulatory agencies. Regulatory requirements have put an increasing burden on school districts to more efficiently manage their curricula, show year-over-year improvement in student achievement, ensure their educators are meeting their goals and assessments, and to reduce any disciplinary incidents during their school years.

Regulations are imposed at the local, state and federal levels, and can represent an insurmountable reporting problem for schools that are not equipped to quickly analyze existing data and seamlessly turn that data into the required information.

**KPI Partners' K-12 Analytic Applications** arms school districts with these capabilities – and bases their solution on the industry leading Student Information Systems software facilitating ParentConnect and StudentConnect. This Application will allow schools to:

- Provide for faster Compliance Reporting
- Allow schools to monitor attendance and disciplinary issues in real time
- Provide better insight into student information and achievement
- Analyze trends across multiple criteria
- Be proactive in monitoring their own goals and actual activities

- **Predefined Star Schema data model** that includes Grades, Scores, Goals, Absences, Attendance, Staff Schedules, Enrollment, Tests and Disciplinary information and more!
- This information can be analyzed across **Conformed Dimensions** such as Date, Location, Period, Program, Student, Course, Disciplinary Action and others....
- Extract, Transformation and Load (**ETL**) for the data model is predefined and out-of-the-box, is based on industry-standard Student Information Systems and is amendable and extensible.
- **Dashboards** are standard and out-of-the-box and can be modified to suit individual reporting requirements as well as personal look and feel.
- Standard out of the box **Reports** are available across all subject areas and are amendable and extensible.
- Web-based **User Interface** is configurable and easy to use.

### About KPI Partners

KPI Partners is the largest and most experienced consulting firms focused on Oracle Business Intelligence Enterprise Edition Plus (OBIEE +) and Oracle BI Analytical Applications.

Our talented and experienced staff has a strong background in product management, engineering, expert services, and the competency centers for analytics divisions at Siebel, Hyperion and Oracle.

KPI's founders were early pioneers at many packaged BI Applications companies including Siebel, Informatica, Epiphany, PeopleSoft and Cognos, and were intimately involved in driving the architecture of the packaged Analytical Applications that Oracle sells today.

KPI Partners has operations in North America and in India. The company strongly believes in the motto "Business Intelligence Beyond Reporting" and is considered a thought leader in packaged BI Application strategies and operational BI.
