

Search & AI-Driven Customer 360° Analytics

You are collecting more customer data than ever before that you can use to improve and personalize the customer experience throughout every interaction with your organization. The majority of this data is generated in the cloud, making it ideal to store and analyze it in the cloud as well.

With Customer 360° analytics from Snowflake and ThoughtSpot, you can uncover granular customer insights with search and AI-driven analytics on Snowflake's high performance, zero management built-for-the-cloud data warehouse. Simply connect, select your customer data, and start searching. Queries run where the data lives to give you the most up-to-date answers.

Why Snowflake + ThoughtSpot for Customer 360° Analytics

Simple
